INTERNATIONAL WEBINAR ON

**Process-driven organic contaminants
in food and mitigation strategies**

Thursday,

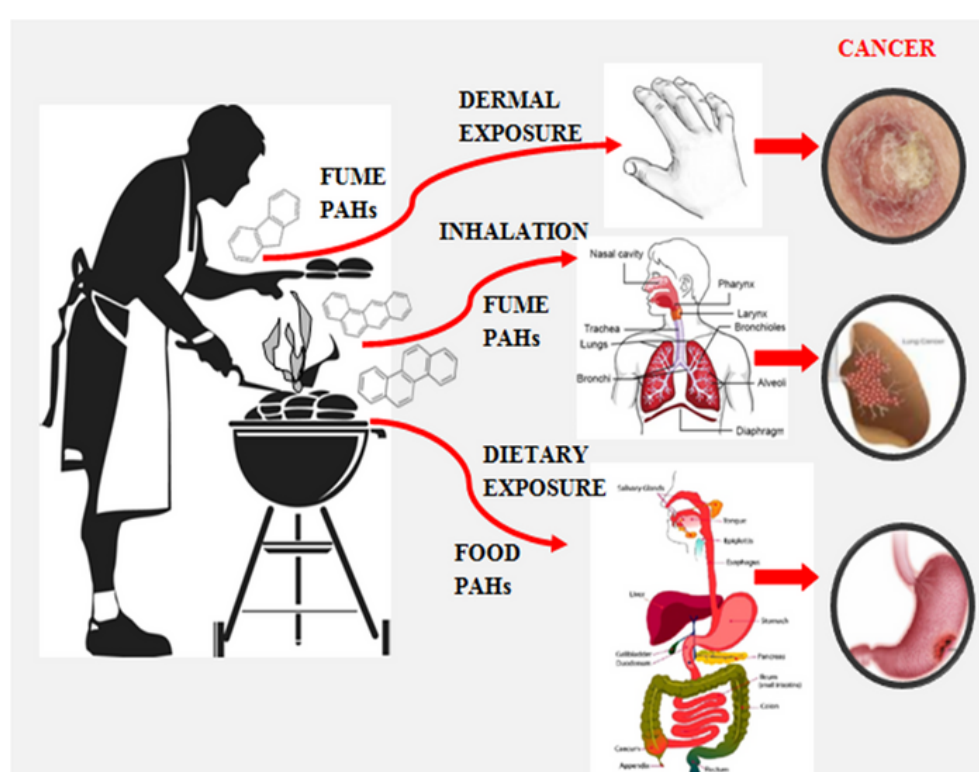

10th Sep 2020

03.30 pm to 5.30 pm (IST)

12.00 pm to 2.00 pm (CET)

About the webinar

Food undergoes chemical changes during processing such as baking, roasting, grilling, frying etc. and generate contaminants like acrylamide, PAHs, heterocyclic amines. Many of these compounds possess mutagenic and carcinogenic properties posing serious health hazards to humans. Hence it is important to understand the occurrence of these contaminants in food and possible mitigation strategies to address the food safety issues and minimize the health risk.
