

DR. SUVRAT KUMAR SINGH

Professor
Department of Food Process Engineering
SHUATS, Allahabad

Dr. Suvrat Kumar Singh has 25 plus years of Professional Experience in the field of Food Processing/Engineering – both in Industry and Academia. He had worked in Industries in USA, Russia and India with vast experience in Food Processing, Operation and Marketing/Sales. He had worked in reputed industries such as Delimex and Ruiz in USA, Producty Pitania in Russia, and Reliance Industries, Vista Foods, and Fun Food in India.

Dr. Singh has his education from JNKVV Jabalpur, IIT Kharagpur, University of Illinois and Iowa State University. He had published 13 research papers in international journals and is life time member of ASAE, Professional member of IFT, and Life time Member of Maize Miller’s Organization at University of Illinois. He is also a recipient of Young Scientist Award sponsored by MPCOST, “Freedom from Hunger” Scholarship by Rotary International, and Research Assistantship for his MS and Ph.D. He had received International Engineering Training at IIRRI Philippines.

The unique property Dr. Singh has is the cross functional experience of teaching, research and industry. Most importantly he has this special training from both India and Abroad (where he spent 13 yesars).

Presentation Summary

Detail Project Report (DPR) - An Analytical Tool to Enhance Business Performance

Detailed Project Report, though, is understood as a document that contains factual data & information and is used to get bank finance only, it is essentially an important cornerstone for setting-up of business operations and a roadmap of the entrepreneur that leads the company to success through appraisal. It consists of information on commercial, technical, financial, economical and managerial aspects. Most importantly it should have sufficient details and key performance indicators (KPI) that envisages the possible fate of the project when implemented. The current presentation is designed to show step by step development of the balance sheet, profit & loss statement sheet and the cash flow statement and its importance. It also defines the ratios (KPIs) in most comprehensible manner and explains how to draw inference s out of it.
