

PACKAGING OF ISABGOL

AATMANIRBHAR BHARAT

PM Formalisation of Micro Food Processing Enterprises Scheme (PM FME Scheme)

IMPORTANCE OF PACKAGING

- Packaging is an important part of food manufacturing process. It protect the food products from physical ,chemical, biological damages.
- Without packaging, materials handling would be a messy, inefficient and costly exercise and modern consumer marketing would be virtually impossible.
- Packaging Institute International defined packaging as the enclosure of products, items or packages in a wrapped pouch, bag, box, cup, tray, can, tube, bottle or other container form to perform one or more of the following functions: containment, protection, preservation, communication, utility and performance. If the device or container performed one or more of these functions, it was considered a package.

CONCEPT OF PACKAGING

- ✓ Packaging is the science, art and technology of enclosing or protecting products for distribution, storage, sale, and use.
- ✓ Packaging also refers to the process of designing, evaluating, and producing packages.
- ✓ Packaging contains, protects, preserves, transports, informs, and sells

NEED OF PACKAGING

- **CONTAINMENT**: protecting the environment from the myriad of products that are moved from one place to another.
- **PROTECTION**: to protect its contents from outside environmental influences such as water, water vapor, gases, odors, microorganisms, dust, shocks, vibrations and compressive forces.
- **CONVENIENCE**: Products designed to increase convenience include foods that are prepared and can be cooked or reheated in a very short time, preferably without removing them from their primary package.

TYPES OF PACKAGING

- **PRIMARY PACKAGING:** Primary packaging is the packaging in direct contact with the product itself and is sometimes referred to as a consumer unit. The main purpose of primary packaging is to contain, protect and/or preserve the finished product, particularly against contamination. This is the first layer containing the finished product, such as a plastic pouch holding whole-grain cereal or the cardboard box containing the pouch of cereal.
- This type of packaging is often intended for the end user or consumer. In addition to making it easier for consumers to handle products, it makes the products look more appealing and can be used for communication purposes to convey printed information about the products to consumers.

SECONDARY PACKAGING

- his type of packaging is used outside of primary packaging to group a certain number of products to create a stock-keeping unit, commonly referred to as a SKU.
- It facilitates the handling of smaller products by collating them into a single pack. This type of packaging also provides supplementary protection to help maintain the integrity of the primary packaging.
- In addition, it can serve as a shipping container for small shipments, making it highly useful in e-commerce. Secondary packaging is frequently made up of multiple components (box, padding, separators, reinforcements, bags, paper, etc.).

TERTIARY PACKAGING

- Often also referred to as bulk or transit packaging, this type of packaging is used to group larger quantities of SKUs to transport them from point A to point B (e.g. from production facility to point of sale). During this stage, products are handled as distribution units.
- This type of packaging makes it easier to transport large and/or heavy loads safely and securely. In addition to helping prevent damage, it consequently facilitates the handling, storage and transport of goods.
- An example of tertiary packaging is a stretch-wrapped pallet containing a quantity of cardboard boxes (secondary packaging) to enable efficient product shipping.

PACKING MACHINES USING IN ISABGOL PROCESSING

- ✓ Processed quality products are packed in flexible and cost-effective packaging solutions under total hygienic control regions, while ensuring that the product is kept safe during transit and in storage at the customer end.
- ✓ Different types of packing machines are used for packing isabgol. In market, isabgol is normally available in two forms,
- 1. Isabgol husk
- 2. Isabgol husk powder
- ✓ Packaging of isabgol husk and husk powder incorporates uncoated and covered Uv balanced out PP woven texture without liner, HDPE laminated paper sacks with inner poly-liner, laminated PP woven sacks with internal poly, fiber paper drum and silver plated ring with inward poly-liner.

PACKAGING & LABELING LAWS - FSSAI

- Labeling should contain following information:
- ✓ Name of the food product.
- ✓ List of ingredients.
- ✓ Nutritional information.
- ✓ Declaration of VEG and NON VEG.
- ✓ Declaration of added food additives.
- ✓ Name and address of manufacturer.

PACKAGING & LABELING LAWS - FSSAI

- ✓ Net quantity
- ✓ Code number
- ✓ Lot number/ Batch number.
- ✓ Date of manufacturing.
- ✓ Best before date
- ✓ Country of origin.
- ✓ .Number of pieces
- ✓ Bar Code
- ✓ Brand Name etc

PM FORMALISATION OF MICRO FOOD PROCESSING ENTERPRISES SCHEME (PMFME)

TOTAL OUTLAY: RS.10,000 CRORE

- 2,00,000 FPOs/SHGs/Cooperatives and working micro enterprises to be directly benefitted
- Expected to generate 9 lakh skilled and semi-skilled jobs
- To be implemented over a 5-yr period from 2020-21 to 2024-25
- Cluster approach
- Focus on Perishables.
